

MR.STEAM® LAUNCHES NEW À LA CARTE STEAMBATH AND STEAMTHERAPY® ACCESSORIES

Introducing the MS Light, Chakra Blend Essential Oils Package and Stealth Speakers

LONG ISLAND CITY, N.Y. (March 2010) – [Mr.Steam](http://www.mrsteam.com) is proud to announce the introduction of three additional steambath and Steamtherapy® accessories to energize its already extensive line of steambath products. Developed with the mantra of Making Wellness a Way of Life®, Mr.Steam is releasing the new illuminating MS Light, an inclusive set of seven Chakra Blend Essential Oils and Stealth Speakers for use in the shower.

“These added Steamtherapy® products will bring together the restorative properties of light, scent and sound to invigorate consumers’ steambathing experience,” commented Dan Reinert, vice president of sales and marketing for Mr.Steam. “We are thrilled to offer our clients fresh and customizable options to enhance their personal steam rooms.”

MS Light – The Energy Star Rated MS Light is a sleek, surface mount in-shower light that can be installed in both residential and commercial environments. Designed with modernity in mind, it has an aluminum body finished in brushed chrome and is approximately 8.5 inches in diameter and 4 inches in height.

Chakra Blend Essential Oils Package – Available individually or *now* as a seven pack set, Chakra Blend Essential Oils are packaged in 10 milliliter bottles with integral dropper for use with the Mr.Steam AromaSteam™ steamhead and Series 200 Towel Warmers, thus enabling an aromatic spa-like experience both in the shower and in the bathroom.

Individually formulated to harness the complimentary powers of scent and light, Mr.Steam’s Chakra Blend Essential Oils are made from extracts of organic plant and flower matter. Each aromatic blend is crafted to work in harmony with a color setting of the Mr.Steam ChromaSteam® System. Scents include Red Vitality, Invigorating Orange, Yellow Awakening, Green Harmony, Celestial Blue, Mystic Indigo and Violent Nirvana.

Stealth Speakers – For use in most showers and sound systems, these hidden transducers provide audio without obtrusive, visible speakers. Depending on the mounting surface, the typical frequency response is 400-20,000 hertz. The speakers are 3 inches in diameter and 1 inch deep, and they do not require cutting holes in the shower interior finish.

Available immediately, the three new products can be purchased à la carte. In addition, Mr.Steam has updated their Butler Package which now comes with the new Steam Genie™.
